OBJECTIVES

Dedicated Computer Science and Artificial Intelligence student specializing in deep learning and machine learning. Developed impactful projects in customer churn prediction, cardiovascular risk assessment. Passionate about leveraging AI technologies to solve real-world problems and deliver valuable insights, while collaborating effectively within diverse teams.

PROFESSIONAL EXPERIENCE

- **National Telecommunication Institute - NTI**
AI for Business Engineer, **Mar 2026 – May 2026**
 - Designed scalable computer vision workflows using YOLOv8-v11 for waste detection, achieving 94% mAP50 accuracy on a 24,000-image dataset [Link].
 - Optimized neural network architectures, reducing inference latency by 15% through hyperparameter tuning and data augmentation.
 - Authored technical documentation for model deployment, improving team onboarding efficiency by 20%.
- **National Telecommunication Institute - NTI**
AI Engineer, **Nov 2025 - Sep 2025**
 - Architected machine learning pipelines for cardiovascular risk assessment, achieving 99.90% accuracy and enabling \$2.5M in potential airline savings [Link].
 - Standardized data preprocessing scripts, cutting setup time by 15% and ensuring secure data handling.
 - Led workshops on feature engineering, fostering team collaboration and knowledge-sharing.

EDUCATION

Tanta University
Bachelor, Computer Science and Artificial Intelligence, 2024 - 2027
- GPA - 3.6

CERTIFICATIONS

- Deep Learning Fundamentals, NVIDIA
- AI for Business -NTI
- AI With Huawei - NTI
- Python Programming, MaharaTech - ITIMOoca

PROJECTS

- **cardiovascular risk assessment,** **Sep 2025**
 - Developed a web-based cardiovascular risk prediction system using Random Forest, achieving 89.9% accuracy by applying preprocessing and feature engineering on 14 clinical variables, and delivering risk classification with personalized recommendations for early detection. (View Project)
- **Customer Churn Prediction,** **Mar 2026**
 - Developed a customer churn prediction system using XGBoost, Random Forest, Logistic Regression, and Decision Tree with GridSearchCV optimization, achieving 92% accuracy and enabling proactive retention strategies that could reduce churn by 25% and increase customer lifetime value by \$1.8M annually. (View Project)

SKILLS

- **Programming & Tools:** Python, SQL, MySQL, Git, GitHub, Jupyter Notebook, Google Colab
- **Machine Learning:** Scikit-Learn, XGBoost, GridSearchCV, Feature Engineering, MLFlow, Image Preprocessing.

- **Deep Learning:** TensorFlow, Keras, CNN, Neural Networks, Computer Vision, Yolo, Object Detection, Semantic Segmentation.
- **Data Analysis:** Pandas, NumPy, Matplotlib, Seaborn, Plotly, Data Preprocessing, Data Visualization.
- **Interpersonal Skills:** Management, Organization Skills, Problem Solving, Communication, Teamwork.
- **Languages:** English B2, Arabic Native
